

Commercial Vehicles...

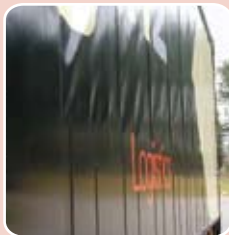

Structure-flex has been a well-respected supplier to the Transport industry for more than 35 years, representing quality, reliability and high levels of customer service. The company manufactures a comprehensive range of products from reinforced thermoplastic materials, including tension curtains and covers for commercial vehicles.

The manufacture of high quality tension curtains has played a major role in Structure-flex's success since the product was first invented in the early 1970s, and the company has continued to provide an increasing range of innovative technical products for the commercial vehicle industry ever since. With a constant focus on quality and service the company is able to supply low cost options from its partner manufacturing facilities in Europe.

Key to the success of the Commercial Vehicle division is Structure-flex Promotional Graphics, the company's in-house design studio, which designs and produces graphics for a range of vehicles and tension curtains.

Acquisition and distribution agreements with other suppliers have enabled Structure-flex to include industrial covers, sliding and fixed roofs, pillars and doors, and new locking products in the range of manufactured goods it supplies to the transport industry.

Flexibility is not just part of product range and service but core to Structure-flex's production approach. The company places a great deal of emphasis on training to ensure consistently high levels of quality.

Smoothside

Smoothside is a unique curtainsider product, available to suit every body type, with a patented clip and rave combination, which provides a fully tensioned buckle free side.

Tilts and Covers

Structure-flex manufactures tilts in a variety of different designs, suitable for height adjustable assemblies, sliding tilts incorporating both sides and roof as well as roll-up flaps.

Tension Curtains

To complement the base product, the Structure-flex range includes insulated curtains, security curtains, ventilated poultry curtains, rear curtains and internal nets.

Sliding Roofs

Structure-flex has increased its range of products to include vehicle sliding and fixed roofs, pillars and doors and a new range of locking products.

Reflex

Re-flex curtains are particularly effective for applications where there is a need for frequent opening/closing of the curtainsider.

After Sales Spares

As part of its commitment to lifetime support and customer care, Structure-flex offers a comprehensive range of spares and accessories.
